3. CT DEEP COP Application – 123 Saddle Rock LLC, 123 Saddle Rock Road, Stamford, CT. The proposed activities include retaining, maintaining, and repairing existing waterfront structures, including pre-1939 seawall and revetment, pre-1995 concrete steps and boat ramp, and seasonal/temporary marine railway. Tim DeBartolomeo, Sound Engineering Associates, was present to explain the project and answer questions on behalf of the applicant.

Commissioner Adelberg made a motion to recommend to the HMC a finding of consistency with the Harbor Management Plan which encourages and supports timely repair and maintenance of existing shore protection structures, with the understanding, based on information provided by the applicant, that the proposed work will be within the footprint of the existing waterfront structures and provided: 1) written permission is provided the neighboring property owner for the applicant's proposed temporary construction use of the neighboring property; 2) the applicant is required to employ Best Management Practices during construction to avoid adverse impacts on environmental quality in the Harbor Management Area, including BMPs for inspection, maintenance, and operation of construction equipment operating on the temporary construction road seaward of the CJL; and 3) the applicant's extended littoral property line is added to the application plan drawing.
