Notes: Map created using ESRI ArcGIS software. Colors on the map appear darker than the colors in the legend due to hillside illumination effect.

This map represents surface elevation (feet, NAVD 88) derived from the Digital Terrain Model (DTM) from Stamford's 2011 aerial flight. The DTM data shown represents bare ground surface elevation without any objects like buildings and trees. Based on this data, the highest ground elevations are located in the vicinity of East Middle Patent Road, and the lowest ground elevations border Long Island Sound. Map produced by City of Stamford GIS, 2013.
